

**БОРИС МЛАДЕНОВ-YOUNG
THE HUMAN BEING SHARES
COMMON FEATURES...**

chitanka.info

*The human being shares common features
with thousand of living earthy creatures;
His organs, systems and skeletal frame
in structure and in functions are the same.*

*He's making love... He sleeps, and drinks, and eats,
and often does shameful and beastly deeds.
He can not fly, cos doesn't have wings,
but like a birdie beautifully sings.*

*His brain's the only thing of different kind —
It's developed an unique human mind.
But an instinct, blessed with an intellect,
more dangerously than a beast can act.*

*Oh, dear Lord, with your might divine
a monster you've created — Frankenstein!*
Sydney, Australia — 2015
